Looking for Real-World Experience to Gain Instructional Design Skills?

Make an impact. Join #openabe MOOC!

Analyze
SKILL 01

Consider key aspects of the design need, including the learner, context, and project requirements.

### Synthesize
SKILL 02

Generate possible solutions to instructional need based on instructional design strategies and principles.

Simulate
SKILL 03

Develop and draft representations of your design conceptions as open educational resources (OER).

Evaluate
SKILL 04

Critically examine instructional efficacy & efficiency through self, peer, and expert review.

Decide
SKILL 05

Make final design decisions based on review of evaluation feedback.
